Associations

Lighting Association

For a number of years, Ansell Lighting has held full membership of the UK's leading trade organisation, The Lighting Association.

Ansell have elected to participate in the Lighting Association's Code of Practice scheme that is designed to substantiate Members' claim of conformity with relevant EU directives and the BS EN 60598 standard.

By taking part in this scheme all of our manufacturing facilities are audited on an annual basis to ensure compliance and quality.

Enhanced Capital Allowance

To endorse Ansell Lighting's credentials as a supplier of Energy Saving equipment, we are proud to have been approved by the Carbon Trust for the Energy Technology List, illustrated by our Authorised User No. 00841

Ansell are listed in the Technology category of Lighting, under the sub technology heading of HELU (High Efficiency Lighting Units).

Ansell luminaires are required to meet strict criteria governing the light output ratio of the luminaire and also, type of lamp used. Each luminaire is allocated an "F" rating to signify its efficiency, similar to the ratings seen on white goods, such as washing machines and fridges.

In addition to the energy saving benefits, end users are permitted to claim the value of equipment as an Enhanced Capital Allowance against their tax and may even be eligible for interest free loans from the Carbon Trust to assist initial purchase.

The Technical section contains a list of qualifying equipment, with solutions available for most applications.

Environmental

Energy Saving

Protecting the environment is a priority for Ansell Lighting. Therefore, by incorporating highly efficient quality control gear, lamps and LED technology, we are able to offer energy saving solutions.

Savings of 25% can be enjoyed in running costs over the service life of the luminaire by simply selecting an Energy Efficient product.

Look out for the Energy Efficient logo widely used throughout this catalogue.

Waste Electrical Equipment Directive (WEEE)

The Waste Electrical Electronic Equipment Directive (2002/96) is an EU legislative document that has been adopted into UK law. The directive can be interpreted differently in each of the EU member states.

It deals with the collection and recycling of applicable products when they reach the end of their service life.

All Non-Household luminaires and Gas Discharge lamps are covered by the directive and products are identified by the crossed-out "wheelie bin" symbol.

Producers of equipment are issued with a unique code number, to show that they are registered with the appropriate authorities.

Ansell Electrical Products (Warrington) - **WEE/FH0429XT**
Ansell Sales and Distribution (Belfast) - **WEE/GJ0292UQ**

To meet our obligations as a producer, Ansell Lighting has joined a compliance scheme. Collection and recycling of relevant products will be handled by the compliance scheme. Contact details can be obtained from Ansell Lighting.

RoHS

The Restriction of Hazardous Substances Directive (2002/95/EC) is an article 95 directive, meaning it is consistent across all European Union member states.

Since July 1st 2006 the use of hazardous substances is restricted in products, to prevent damage to the environment.

The prohibited substances are Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyls and Polybrominated Diphenyl Ethers.

Ansell Lighting is committed to ensuring that we meet these challenges and help the environment.
